

IDEATION PHASE – DEFINE THE PROBLEM STATEMENTS

Date	29 September 2026
Team ID	6ab800af30f9767f87729b97
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	2 Marks

Customer Problem Statement

Use the template structure: I am / I'm trying to / But / Because / Which makes me feel.

I am	a ServiceNow administrator managing Institution Details records.
I'm trying to	control record access based on user roles and the Branch field.
But	unauthorized users may be able to access records that should be restricted.
Because	access needs to be enforced at the record level using ServiceNow ACL rules and field values.
Which makes me feel	concerned about unauthorized viewing or modification of institution records.

Problem Statements

Problem Statement	Project-Specific Statement
PS-1	ServiceNow institution records need controlled access so that only authorized users can view records according to role and Branch value.
PS-2	Users require different CREATE, WRITE and DELETE permissions, while administrators require full access to all Institution Details records.
