| Date          | 29 September                                                        |
| Team ID       | 6ab800af30f9767f87729b97                                            |
| Project Name  | Script-Controlled ACL – Restrict Record Access Based on Field Value |
| Maximum Marks | 4 Marks                                                             |

### Empathy Map Canvas – ServiceNow Administrator / Institution Staff

|                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                               |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>THINK &amp; FEEL</b> <ul style="list-style-type: none"><li>• Concerned about unauthorized access to institution/student records.</li><li>• Wants access rules to be clear and enforceable.</li><li>• Wants administrators to retain full access.</li></ul> | <b>HEAR</b> <ul style="list-style-type: none"><li>• Reports or concerns about users accessing records they should not see.</li><li>• Requests for stronger record-level security.</li><li>• Need for controlled permissions for different users.</li></ul>                    |
| <b>SEE</b> <ul style="list-style-type: none"><li>• Institution Details records with different Branch values such as ECE, EEE and CSE.</li><li>• ServiceNow users with different roles.</li><li>• ACL configuration and access results.</li></ul>              | <b>SAY &amp; DO</b> <ul style="list-style-type: none"><li>• Configures roles and ACLs in ServiceNow.</li><li>• Creates Institution Details records.</li><li>• Tests access using user impersonation.</li><li>• Verifies READ, CREATE, WRITE and DELETE permissions.</li></ul> |
| <b>PAIN</b> <ul style="list-style-type: none"><li>• Unauthorized viewing or modification of records.</li><li>• Difficulty enforcing field-based restrictions consistently.</li><li>• Risk of incorrect permissions.</li></ul>                                 | <b>GAIN</b> <ul style="list-style-type: none"><li>• Controlled access based on role and Branch.</li><li>• Admin full access.</li><li>• Clear separation of CREATE, WRITE and DELETE permissions.</li><li>• Easier verification through impersonation testing.</li></ul>       |

### Personal / User Focus

Primary persona: ServiceNow administrator or authorized institution staff member who manages and accesses Institution Details records and needs role- and Branch-based access control.
